

# April 2025 Partnership Update

## Cancer Statistics for African American and Black People

[Cancer Statistics for African American and Black people, 2025](#) is a scientific article published in the American Cancer Society's flagship journal, *CA: A Cancer Journal for Clinicians*, in the Facts & Figures series. The article provides the most recent statistics on cancer occurrence; risk factors such as tobacco use, obesity, and physical activity; and the use of cancer screening tests among African American and Black people.

For consumer-friendly highlights from the article, see [Fast Facts: Cancer in African American and Black People, 2025](#).

## ACS CancerRisk360™

To help improve cancer prevention and risk reduction, the American Cancer Society (ACS) developed ACS CancerRisk360. This interactive online tool provides individuals a personalized, comprehensive assessment of cancer risk along with resources to empower and enable them to help reduce their risk of cancer through healthy lifestyles, regular cancer screening, and genetic counseling and testing direction.

**Can Prostate Cancer Testing Benefit You?**  
Knowing your risk for prostate cancer can help you decide if testing (also called screening) is the best choice for you.

**¿Pueden beneficiarse las pruebas para detectar el cáncer de próstata?**  
Conocer su riesgo de padecer cáncer de próstata puede ayudarlo a decidir si las pruebas de detección son la mejor opción para usted.

# Overcoming Weakness & Fatigue Symptom Management Video

This short video answers some of the most common questions people have about dealing with fatigue during cancer treatment. It explains how things like eating a healthy diet and staying active can help boost a person's energy.
